1 ECOLOGICAL IMPACT

0 1 2 3

Enhances biodiversity
Creates habitat for native species
Supports natural processes such as soil regeneration, water infiltration, or pollination

REFLECTION QUESTIONS

Is this solution simply "green", or does it create a living ecosystem?
Which species might benefit from this intervention?

2 CLIMATE ADAPTATION

0 1 2 3

Improves rainwater management
Reduces heat and provides shade
Increases resilience to droughts or extreme rainfall

REFLECTION QUESTIONS

How would this solution perform during drought or heavy rain?
Does it improve the local microclimate?

3 SOCIAL BENEFITS

0 1 2 3

Can be used and enjoyed by people
Is inclusive for different user groups
Feels safe and welcoming

REFLECTION QUESTIONS

Who would use this place?
Who might still be excluded?

4 FEASIBILITY

0 1 2 3

Can be implemented at low cost
Can be developed using local knowledge and materials
Can realistically be maintained over time

REFLECTION QUESTIONS

Is this solution realistic?
Who will maintain it?

5 MULTIPLE BENEFITS

0 1 2 3

Addresses more than one challenge
Provides both ecological and social benefits
Creates long-term value

REFLECTION QUESTIONS

Does this solution solve only one problem or transform the whole system?

6 CONNECTIVITY

0 1 2 3

Connects with other green areas
Strengthens ecological corridors

REFLECTION QUESTIONS

Is this place isolated or part of a larger network?

7 STEWARDSHIP+PARTICIPATION

0 1 2 3

Encourages community ownership
Creates opportunities for participation and collective care

REFLECTION QUESTIONS

Will local people feel that this is "their place"?
